SUMMARY

Flutter Developer with 4+ years of experience building scalable and maintainable cross-platform applications using Flutter and Dart. Strong expertise in BLoC, Provider, and Clean Architecture, with hands-on experience integrating REST and GraphQL APIs. Skilled in Firebase (Authentication, Firestore) and performance optimization for production-ready apps. Familiar with native Android (Kotlin) and iOS (Swift) for platform-specific integrations, and possess working knowledge of React.js and SQL/MongoDB for effective full-stack collaboration.

CORE SKILLS

Flutter, Dart, Android, iOS

State Management: BLoC, Provider

Architecture: Clean Architecture, Modular Architecture, MVVM

Backend & Databases:

- Firebase Authentication, Firestore, REST APIs, FastAPI (basic), GraphQL
- SQL (MySQL/PostgreSQL – basic queries)
- MongoDB (CRUD, schema design – basics)

Frontend: React JS (Functional Components, Hooks, API integration)

Tools: Git, Postman, Agile/Scrum, Performance Optimization, Unit Testing, CI/CD

PROFESSIONAL EXPERIENCE

Software Developer – Hash Connect Integrated Services Pvt Ltd (Feb 2024 – Mar 2026)

- Developed **Achivr**, a sports social commerce Flutter application with e-commerce and community features; successfully deployed to App Store & Play Store
- Built scalable architecture using **BLoC with Clean Architecture** ensuring maintainable and testable codebase
- Developed and maintained LMS applications for enterprise clients (**Dell, Lenovo, ASUS**) with robust feature implementation
- Improved app performance by ~30% through widget optimization, lazy loading, and caching
- Collaborated with designers, QA, and backend teams in Agile/Scrum environments

Mobile App Developer – Primates Development Pvt Ltd (Mar 2022 – Feb 2024)

- Developed **AutoBuy Direct**, a customer-facing automotive app enabling users to list and sell vehicles with price estimation and buyer connectivity
- Built **AutoBuy Appraisal**, an internal application for field agents to inspect vehicles, upload reports, and generate accurate price evaluations
- Developed **Veromatic**, an IoT-based coffee machine software with real-time system integration
- Integrated Firebase Authentication, Firestore, and push notifications for real-time user engagement
- Implemented payment gateways and optimized API handling for secure and efficient transaction processing
- Deployed applications to Play Store and enterprise environments ensuring smooth release management

EDUCATION

Bachelor of Vocation (Software Development) – Alagappa University (2019 – 2022)

- 84%

Languages

- Tamil • English
